GitHub Desktop	Git

WORK HISTORY

06/2023 to **Software Developer**

Current **Freelancer** – Pune, India (Remote)

- 3 Years of experience as a Freelancer Consultant in React Native(Mobile App)
- Built responsive user interfaces utilizing modern front-end technologies like React JS, Next JS or Tailwind CSS.
- Created interactive UI components utilizing React JS, enhancing overall usability and user engagement.

07/2022 to **React Native Developer**

06/2023 **Appventurez Mobitech Pvt Ltd** – Noida, India

- 1 Years of experience as a Software Developer in Appventurez Mobitech Pvt Ltd.
- Served as a Frontend Developer specializing in React Native CLI and Expo CLI.
- Enhanced app performance by optimizing React Native components and implementing best practices.

EDUCATION

06/2013 to **Bachelor of Technology: Mechanical Engineering**

06/2017 **Jawahar Lal Nehru Technological University** - Hyderabad, India

PROJECTS

Mobile App Projects:

1. Dayprise App:

- Developed using React Native CLI within the React ecosystem.
- Built responsive UI components based on prototypes and wireframes.
- Integrated third-party libraries and APIs for enhanced functionality.
- Implemented Redux for efficient state management and improved app performance.

2. Social Media App:

- Built with Expo CLI for a faster development and testing workflow.
- Utilized Expo libraries to create an interactive and user-friendly interface.
- Integrated Clerk for secure user authentication.
- Connected to a Convex backend to manage database operations and real-time data.

MERN Projects:

Chat App and E-Commerce Store:

- Use React.js for the user interface, style with Tailwind CSS for utility-first design, and integrate Daisy UI for pre-built components.
- Implement **Zustand** for managing the application's state.
- Set up the backend with **Node.js** and **Express.js**.
- Connect the backend to a **MongoDB** database for data storage.
